SSC	Audisankara Techno School	S.S.C	2015	60

Skills

Java, Python, AWS, Devops, Linux, Software Testing

Operating Systems: Windows, Linux, and Android

Project Work:

- Project Name: A Modified Hierarchical Attribute Based Encryption Access Control Method For Mobile Cloud Computing.
- Technologies Used: Python, Pycharm, MySQl
- Project Description: Cloud computing is an Internet-based computing paradigm whereby shared resources are provided to on-demand devices. This is a developing

but promising example of integrating mobile devices into cloud computing, and the integration works in a cloud-based hierarchical multi-user data-sharing environment. With the integration into cloud computing, security issues such as data privacy and user authorization may arise in the mobile cloud computing system and are considered as major obstacles to the development of mobile cloud computing.
